

My Bio-Harmonies

HANDCRAFTED LIVING ECOSYSTEMS

Welcome

— to Your —

Living Ecosystem

Thank you for choosing a handcrafted
living ecosystem from My Bio-Harmonies.

Together, let's create balance,
beauty and harmony in your space.

SUSTAINABLE

HANDCRAFTED

HARMONIOUS

My Bio-Harmonies

HANDCRAFTED LIVING ECOSYSTEMS

Caring for Your Living Ecosystem

LIGHT

Place in bright, indirect light.
Avoid direct sunlight, which
can overheat the glass.

WATERING

Water only when the soil
appears dry. Usually a few
teaspoons is enough.

VENTILATION

Open the lid or remove the
cork for a few minutes every
1–2 weeks to refresh the air.

TEMPERATURE

Ideal between 18–24°C.
Keep away from heaters,
air conditioning and draughts.

ENJOY

Watch your ecosystem grow
and change with the seasons.
Each one is unique.

A Living, Evolving Work of Nature

Over time, plants will grow, moss will spread and the landscape will evolve.

This is a natural part of your ecosystem's journey.

Relax, enjoy and reconnect with nature.
